2) Web page design using HTML

i. Create a website to promote tourism in West Bengal. The opening page should display an attractive image of a prominent tourist place and

hyperlinks to information on different places to visit in West Bengal, and external link to official website of the Department of Tourism. The website should have at least 5 pages linked to the home page.

ii. Create a website on your favourite festival. Include text, images and links to further information.

iii. Create a catalogue of books as a web page. It should have a table with columns for title, author, ISBN number and price of books. Enter the details of 10 books.

iv. Make a website on pollution and its control. The opening page should have a short introduction and hyperlinks to various kinds of pollutions, such as land, air and water pollutions. Include suitable images and external links for further reading.
